WORK EXPERIENCE

Project Lead (Contractor) at Vodacom HQ

INVENTIONS TECHNOLOGIES CO. LTD

05/2019 - Present

- I am positioned as PROJECT LEADER.
- Collaborated closely with senior management and stakeholders to define project scope, goals, and deliverables, aligning initiatives with overarching business objectives.
- Proficiently facilitated the development of business cases and requirements documents, emphasizing the importance of securing approvals from relevant parties.
- Ensured timely and clear communication of project expectations to team members and stakeholders, fostering a shared understanding of project objectives.
- Sustained communication with project stakeholders throughout the project lifecycle, addressing concerns promptly and ensuring alignment with project goals.
- Expertly planned and scheduled project timelines and milestones using tools like Trello, tracking project progress and addressing deviations.
- Defined the content and frequency of status reports, analyzed results, and promptly addressed issues to ensure transparent project progress.
- Established and disseminated project success criteria across all stakeholders to ensure a common goal and foster accountability.
- Actively contributed to the development of project execution best practices and tools, enhancing project management processes for improved efficiency.

- Consistently adhered to the organization's project management methodology (agile & Waterfall), ensuring compliance with governance and documentation requirements.
- Directed and managed project development from inception to completion, creating comprehensive project plans and communication documents to guide teams effectively.
- Delegated tasks efficiently, identified and resolved issues and conflicts affecting project progression, fostering a collaborative and productive work environment.
- Managed project dependencies, critical paths, and effectively addressed risks and issues through proper escalation and ownership.
- Developed and delivered comprehensive progress reports, proposals, and requirements documentation, including regular presentations to senior management for stakeholder alignment.
- Accurately estimated resources required for daily operational and non-operational change schedules, optimizing resource allocation for maximum efficiency.
- Ensured seamless knowledge transfer and essential training, facilitating the introduction of processes crucial for supporting projects, products, or services.

Test Engineer

INHEMETER

07/ 2018 – 05/2019

- I was positioned as TEST ENGINEER
- During production, after the AGING test phase, I run 36 meters through machine software. They get calibrated and tested to confirm all the signals are working fine.
- I am also a supervisor at the Packaging line, where all the meters are finalized ready packaging and transport. My main task there is to oversee the line. I made sure the line produced at a targeted number of meters per hour, making sure materials are available for production, and finally people management.
- Also, as a computer engineer, I was responsible for maintaining all the computers in the factory for easy smooth during production.

Web Developer

AMICIDESIGN

07/2017 – 09/2017

- I was positioned as Web Developer
- Developed websites from scratch using both CMS - WORDPRESS and (HTML, JavaScript and CSS).
- Attending to every day amends from clients on different live sites.
- Met with clients, collecting requirement for website build.
- Designed different Graphics designs needed to complete the website development.

Computer Laboratory Technician

Tanzania Institute of Accountancy

04/2014 – 06/2015

- I was positioned as Computer Laboratory Technician.
- Overseen the operation of every IT service involved in the Lab.
- I redesigned and re-construct the Institutional Website (www.tia.ac.tz) and I was in charge of maintenance and updating the website features along with new posts.
- Maintained and operated the Windows server 2012 used in the laboratory by adding new users, resetting passwords, and granting access to different lab resources like Printers, files, etc.
- I made it sure the Computers in the Laboratory are used accordingly for educational purposes only and provide any help needed by students about assignments or computer usage.
- Maintained and troubleshoot all the hardware and software problems of all the PCs and Printers in the computer laboratory, Ensuring safety of every Computer and other equipment in the Lab.

SKILLS
